RECOVERIES OF SALMON TAGGED OFFSHORE IN THE NORTH PACIFIC OCEAN  
BY JAPAN AND THE UNITED STATES IN 1970 AND 1971, AND ADDITIONAL  
RECOVERIES FROM EARLIER TAGGINGS BY CANADA, JAPAN, AND THE  
UNITED STATES

Recoveries of salmon tags from the 1956 to 1969 taggings on the high seas by Canada, Japan, and the United States were reported by Aro et al (1971). The Canadian data included information on all tags which were returned to September 30, 1970. Recoveries of Japanese tags included all recoveries reported to September 1969. The United States data included all recoveries of Fisheries Research Institute tags reported to May 1, 1970 and all recoveries of Alaska Department of Fish and Game tags to May 31, 1970.

The present report contains information on recoveries from salmon taggings on the high seas in 1970 and 1971 by Japan and the United States, and includes additional recoveries from the 1956 to 1969 taggings subsequent to those reported by Aro et al (1971). These data were reported in INPFC Document No. 1398 submitted by Canada; INPFC Document No. 1305, 1306, 1415, and 1430 submitted by Japan; and INPFC Document No. 1324, 1325, 1426, 1435, and 1466 submitted by the United States. The Canadian data include information on all tag recoveries reported to September 30, 1971. Recoveries of Japanese tags include recoveries reported to late September 1971. The United States data include recoveries from taggings carried out by the Fisheries Research Institute of the University of Washington from 1956 to 1971 and from taggings carried out by the Alaska Department of Fish and Game from 1967 to 1970. The Fisheries Research Institute data include all tag recoveries reported through February 15, 1972. The Alaska Department of Fish and Game tag recoveries include all recoveries to October 14, 1971.

In this report are listed a total of 532 tag recoveries (Table 1) of which 412 (90 sockeye, 85 chum, 213 pink, and 24 coho) were recovered in the year of tagging and 120 (85 sockeye, 20 chum, 1 pink, 2 coho, and 12 chinook) were recovered in years subsequent to the year of tagging. The actual recoveries are listed in Tables 2 and 3 for sockeye, Tables 4 and 5 for chum, Tables 6 and 7 for pink, Tables 8 and 9 for coho, and Table 10 for chinook. For sockeye, chum, pink and coho, the first table includes recoveries in the tagging year. The second table for these species and the single table for chinook include recoveries in years subsequent to tagging year. The format and codings of the recovery tables are the same as for the recovery tables in Aro et al (1971).
