INTRODUCTION

An earlier version of this bibliographic compilation was prepared in 1957 and was placed in the Manuscript Report Series (Biological) of the Fisheries Research Board, as No. 631. Like the original, the present revision does not include references to Annual Reports of the Fisheries Research Board or to Annual Reports of the Board's Biological or Technological Stations, nor to Annual Reports of other agencies. University theses are not included either. It does, however, include the Manuscript Report Series of the Fisheries Research Board. Monographs on various groups of parasites, in which Canadian records are cited, generally have been omitted. Only original publications concerned with research on parasites or diseases of fishes from Canadian waters are listed.

Several omissions from the original version were brought to my attention; there may yet be others. I would welcome being informed of such omissions.

27. Choquette, L.P.E. 1951. Description of *Metabronema prevosti* sp. nov. with a note on the genus and a list of its species and their host and geographical distribution. Ibid., 29: 102-108.

34. Cooper, A. R. 1915. Trematodes from marine and fresh-water fishes, including one species of ectoparasitic turbellarian. Ibid., Ser. 3, 9(Sec. 4): 181-205.

64. Ellis, M. F. 1930. Investigations on the protozoan fish parasites of the St. Andrew's region. Ibid., 17: 268-275.

68. Fantham, H. B. and A. Porter. 1948. The parasitic fauna of vertebrates in certain Canadian fresh waters, with some remarks on their ecology, structure and importance. Ibid., 117: 609-649.

109. Laird, M. 1961. Trichodinids and other parasitic protozoa from the intertidal zone at Nanaimo, Vancouver Island. Ibid., 39: 833-842.

125. Lyster, L. L. 1940. *Apophallus imperator* sp. nov., a heterophyid encysted in trout, with a contribution to its life history. *Ibid., 18*, 106-121.

141. Margolis, L. 1951. Results of a bacteriological examination of a diseased sucker. Ibid., No. 11, 19-23.

221. Richardson, L. R. 1938. An account of a parasitic copepod, *Salmincola salvelini* sp. nov., infecting the speckled trout. Ibid., 16: 225-229.

**Addendum**
