
Step 1: Fold sheet of paper along each line (Fold in half, then into quarters, and then one more time so that it is folded into eighths)

Step 2: Open your paper so that it is folded in half. Cut along dashed line in the middle so that there is a slit in the middle.

Step 3: Fold your paper along the crease that you just cut, then push the ends in toward each other so all the sections fold into each other to form an eight-page zine.
